CONTENTS

Volume 5, Issue Nos. 1–12 (1985)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, January

On the Effect of Flow Direction on Mixed Convection from a Horizontal Cylinder: H. M. Badr 1

Development and Application of an Adaptive Finite Element Method to Reaction–Diffusion Equations: J. I. Ramos 13

Numerical Calculation of Equivalent Moment of Inertia for a Fluid in a Cylindrical Container with Partitions: I. S. Partom 25

A Finite Element for Incompressible Plane Flows of Fluids with Memory: B. Bernstein, D. S. Malkus and E. T. Olsen 43

A Residual Method of Finite Differencing for the Elliptic Transport Problem and Its Application to Cavity Flow: T. K. Bhattacharyya and A. B. Datta 71

Computation of High Speed Turbulent Boundary-layer Flows Using the k–ε Turbulence Model: A. Liakopoulos 81

CONFERENCE DIARY 99

ANNOUNCEMENTS 100

Issue No. 2, February

The Addition of Quasi-three-dimensional Terms into a Finite Element Method for Transonic Turbomachinery Blade-to-blade Flows: R. D. Cedar and P. Stow 101

A Finite Element Method for the Solution of Two-dimensional Transonic Flows in Cascades: D. S. Whitehead and S. G. Newton 115

Numerical Study of Thermal Convection in Rotating Channel Flow: S. Thangam and C. G. Speziale 133

Turbulent Flow in a Duct with Cusped Corners: C. W. Rapley 155

On the Solution for Steady State and Time Dependent Flows in Certain Channels with Small Wall Curvature: G. A. Georgiou and C. P. Ellinas 169

A Numerical Technique for Three-dimensional Compressible Boundary Layers: A. R. Wadia 191

CONFERENCE DIARY 199

Indexed or abstracted by 'Current Contents' and other leading Indexing/Abstracting Services.

Issue No. 3, March

The Group Velocity of Some Numerical Schemes: B. Cathers and B. A. O'Connor . 201

A Critical Evaluation of Seven Discretization Schemes for Convection–Diffusion Equations: M. K. Patel, N. C. Markatos and M. Cross 225

A Numerical Procedure for the Generation of Orthogonal Body-fitted Co-ordinate Systems with Direct Determination of Grid Points on the Boundary: D. E. Papantonis and N. A. Athanassiadis. 245

Application of the Two-equation k–ε Turbulence Model to a Two-dimensional, Steady, Free Surface Flow Problem with Separation: R. S. Chapman and C. Y. Kuo . . 257

A Review of Some Finite Element Methods to Solve the Stationary Navier–Stokes Equations: A. Segal 269

Finite Element Analysis of the Steady Navier–Stokes Equations by a Multiplier Method: A. Mizukami. 281

SHORT COMMUNICATIONS

Convergence Character of a Solution to the Transport Equation with Polynomial Initial Conditions: I. P. E. Kinnmark and M. F. N. Mohsen 293

Some Results Concerning Approximation of Regularized Compressible Flow: H. Dinh and G. F. Carey 299

CONFERENCE DIARY 303

ANNOUNCEMENT. 304

Issue No. 4, April

The Cell Reynolds Number Myth: H. D. Thompson, B. W. Webb and J. D. Hoffman . 305

Numerical and Experimental Study of Driven Flow in a Polar Cavity: L. Fuchs and N. Tillmark 311

A Compatible Mixed Design and Analysis Finite Element Method for the Design of Turbomachinery Blades: R. D. Cedar and P. Stow. 331

A Method for Predicting Unsteady Potential Flow about an Aerofoil: M. Vezza and R. A. McD. Galbraith. 347

Towards Generalization and Optimization of Implicit Methods: A. Lin 357

The Parametrized Strongly Implicit Method for Solving Elliptic Difference Equations: A. Lin 381

Numerical Outflow Boundary Conditions for the Shallow-water Equations: C. B. Vreugdenhil and N. Booij 393

ANNOUNCEMENTS 399

CONFERENCE DIARY 402

Issue No. 5, May

Application of the DuFort–Frankel and Saul'ev Methods with Time Splitting to the Formulation of a Three Dimensional Hydrodynamic Sea Model: A. M. Davies. . . 405

A Second-order Approximation to Natural Convection for Large Rayleigh Numbers and Small Prandtl Numbers: W. A. Shay and D. H. Schultz 427

On the Computed Pressures for Navier–Stokes Problems at Increasing Reynolds Numbers Using the Penalty Finite Element Method: R. Krishnan and G. F. Carey 439

Application of the Dorodnitsyn Finite Element Method to Swirling Boundary Layer Flow: C. A. J. Fletcher 443

A Three-level Generalized-co-ordinate Group Finite-element Method for Compressible Viscous Flow: K. Srinivas and C. A. J. Fletcher 463

Computation of Three-dimensional Flow Using the Euler Equations and a Multiple-grid Scheme: C. Koeck 483

ANNOUNCEMENTS 501

CONFERENCE DIARY 502

Issue No. 6, June

Mesh Effects on the Computation of Small Amplitude Water Waves: E. F. Toro and M. J. O'Carroll 505

Adaptive Grids in Numerical Fluid Dynamics: W. Haase, K. Misegades and M. Naar . 515

Analytic Test Cases for Three-dimensional Hydrodynamic Models: D. R. Lynch and C. B. Officer 529

Finite Element Analysis of Incompressible Laminar Boundary Layer Flows: S-W. Kim and F. R. Payne 545

Numerical Simulation of Three-dimensional Flow in a Cavity: C. J. Freitas, R. L. Street, A. N. Findikakis and J. R. Koseff 561

An Inviscid Model of Unsteady Aerofoil Flow with Fixed Upper Surface Separation: M. Vezza and R. A. McD. Galbraith 577

SHORT COMMUNICATION

A Note on the Steady-state Advection–Diffusion Equation: J. C. Ferreri 593

ANNOUNCEMENTS 597

CONFERENCE DIARY 599

Issue No. 7, July

On the Performance of Quadrilateral Finite Elements in the Solution to the Stokes Equations in Periodic Structures: A. E. Sáez and R. G. Carbonell 601

Solution of the Incompressible Mass and Momentum Equations by Application of a Coupled Equation Line Solver: P. F. Galpin, J. P. Van Doormaal and G. D. Raithby . 615

Improvement of a Pressure Gradient Method and its Application to an Unsteady Flow Problem: Y. Mochimaru 627

On Numerical Solutions of the Time-dependent Euler Equations for Incompressible Flow: J.-H. Saiac 637

LETTERS TO THE EDITOR 657

ANNOUNCEMENTS 664

CONFERENCE DIARY 665

ERRATA 666

Issue No. 8, August

Laminar Flow in a Complex Geometry: a Comparison: M. Napolitano and P. Orlandi 667

Conforming Finite Element Computations Applied to a Spatially Periodic, Harmonic Navier–Stokes Problem: L. Borne, R. Chambon and J.-L. Auriault 685

Isothermal Flow Past a Blowing Sphere: K. A. Cliffe and D. A. Lever 709

Solution of Shallow Water Equations for Complex Flow Domains via Boundary-fitted Co-ordinates: J. Haeuser, H.-G. Paap, D. Eppel and A. Mueller 727

Dynamic and Convective Results for a Developing Laminar Unsteady Flow: R. Creff, P. Andre and J. Batina 745

CONFERENCE DIARY 761

ANNOUNCEMENT 762

Issue No. 9, September

A New Method for Computing Solenoidal Vector Fields on Arbitrary Regions: K. Gustafson, K. Halasi and D. P. Young 763

Variable Penalty Method for Finite Element Analysis of Incompressible Flow: H. S. Kheshgi and L. E. Scriven 785

A Note on the Stability and Accuracy of C^n Finite Elements in Steady Diffusion–Convection Problems: N. Okamoto and H. Niki 805

Added Mass for Fluid–Structure Vibration Problems: A. Jennings 817

Numerical Modelling of Viscous Non-Newtonian Effects in Lubricating Systems: P. Bourgin, J. M. Francois and B. Gay 831

CONFERENCE DIARY 847

Issue No. 10, October

A Random Vortex Simulation of Wind-flow over a Building: D. M. Summers, T. Hanson and C. B. Wilson 849

A Transient Solution Method for the Finite Element Incompressible Navier–Stokes Equations: Y. Yoshida and T. Nomura 873

The Calculation of Green's Functions in Three Dimensional Hydrodynamic Gravity Wave Problems: M. K. Pidcock 891

Experiments with Several Elements for Viscous Incompressible Flows: M. Fortin and A. Fortin 911

An Efficient Matrix Solver for Finite-element Analysis of Non-Newtonian Fluid Flow Problems: T-J. Liu 929

ANNOUNCEMENTS 939

CONFERENCE DIARY 940

Issue No. 11, November

Finite Element Modelling of Stratified Flow in Estuaries and Reservoirs: I. P. King . 943

On the Numerical Computation of Laminar Boundary Layers at a Phase-changing, Gas–Liquid Interface: S. P. Klotz and R. L. Street 957

Finite Element Analysis of Density Flow Using the Velocity Correction Method: M. Kawahara and K. Ohmiya 981

A Numerical Study of the Applicability of the Boussinesq Approximation for a Fluid-saturated Porous Medium: D. K. Gartling and C. E. Hickox 995

CONFERENCE DIARY 1015

Issue No. 12, December

A Coupled Solution of the Vorticity—Velocity Formulation of the Incompressible Navier–Stokes Equations: B. Farouk and T. Fusegi 1017

Inverse Laminar Boundary-layer Problems with Assigned Shear. The Mechul Function Revisited: K. C. Kaufman and G. H. Hoffman 1035

SHORT COMMUNICATION

Conservative Calculations of Non-isentropic Transonic Flows: M. M. Hafez, W. G. Habashi and P. L. Kotiuga 1047

CONFERENCE DIARY 1059

ANNOUNCEMENT 1060
